

## Your needs

## Our solutions

## In a nutshell

Minimize stress  
and its multiple  
impacts on health

**Stress can impact pets' well-being** but also create **multiple issues**: behaviour, elimination, immunity, skin health, gastrointestinal health, cardiovascular health, etc.

**LACTIUM®** is a dried hydrolysate which contains **a bioactive decapeptide with relaxing properties**.

Its efficacy in pets and horses has been proven in **5 clinical studies** performed on stress and stress-related symptoms.

Reduce joint  
inflammation

**Joint pain** can **reduce pets' mobility**.

**XELFLEX®** is a milk protein hydrolysate from casein.

Its effectiveness on **joint inflammation** has been scientifically proven through **its inhibitory effect on inflammatory markers (cytokines)**.

Maintain blood  
sugar levels within  
normal range

With age and overweight, **disturbances in our pets' blood sugar levels** may arise.

**PEP2DIA®** is a dried whey product with **a bioactive dipeptide AP** that **inhibits alpha glucosidase**, an enzyme in charge of breaking down complex sugars into glucose.

**PEP2DIA®** is clinically proven to help reduce postprandial glycemia in humans. It helps **maintain blood sugar levels within normal range**.

Boost immunity  
and gut health  
in just one step

Often called « liquid gold », **colostrum** is produced by mammals in the first hours after giving birth. It contains lactoferrin but is also **rich with many other immunity and growth boosting compounds**: IgGs, IgAs, PRPs to name a few.

**PRODIET® COLOSTRUM** is a high-quality dried bovine colostrum with a **guaranteed level of IgG of 38% or 48%**.

**Colostrum** has shown real benefits on **pets' immunity & gut health**.

**PROFERRIN®** is a **95% pure lactoferrin** dried whey product extracted from our premium French fresh cow's milk. The efficacy of lactoferrin has been scientifically proven, with benefits on **immunity, gut and oral health**.
